"VisionsLive is located at InfoLab21 because of the vibrancy of the business community and the excellent business facilities.

"This coupled with our ability to establish and develop relationships with relevant faculties at Lancaster University make it an integral part of how we develop and support our growing international business.

"The university campus has excellent transport links and, with the city, provides a wide diversity of culture and local amenities.

"Our staff also enjoy the historical significance of one of the UK's most intimate cities, complete with a castle and a river, and a close proximity to the Lake District."

Andrew Hall, VisionsLive Limited.
